BEOLINO clinic®

burger
swiss
pen®

made of clinical plastics

Our innovative technology is based on the concept of the natural protective coating of the skin, by avoiding the disadvantages of other processes. The effect remains forever and infinitely, occurs rapidly and is skin friendly.

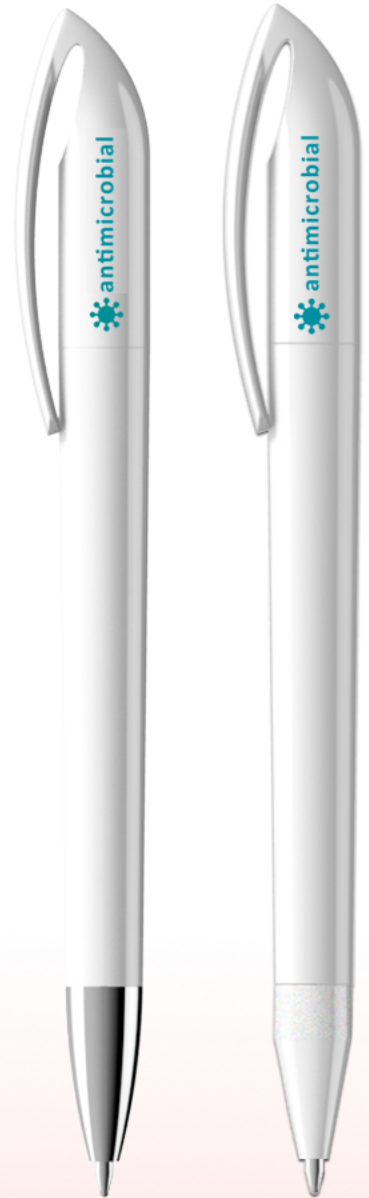

The patented plastic has been developed especially for medical devices in hospital settings, was tested there and its effectiveness has been confirmed by independent laboratories through numerous field trials.

The effect remains active permanently. Protects from viruses, candida, bacteria, biofilms & resistant germs.

100% biocompatible

burger swiss pen AG produces 90% sustainable and reduces the strain on the climate by using short transport routes in the EU and Switzerland.
