

CINEMA \*clinic®

burger  
swiss  
pen.

The power of light  
protects against  
**CORONAVIRUS**

-  Germ-free with light
-  100% biocompatible

**No** nanoparticles  
**No** silverions

BEOLINO clinic®

 antimicrobial

Tested against bacteria and viruses\*  
incl. MRSA, VRE, ESBL and Legionella.  
ISO 22196 and ISO 21702 \*(enveloped)

Certified by independent laboratories and  
clinical reference projects

# CINEMA \*clinic®

burger  
swiss  
pen®

 100% biocompatible

Our innovative technology disinfects surfaces  
using the power of light.

Technical term: photoinduced catalysis.

As a result, a natural protective acid mantle is  
formed, comparable to that of our skin.

The patented plastic was specially  
developed for clinical use, tested in clinical use  
and its effectiveness confirmed in numerous field  
tests by independent laboratories.

Against • Enveloped viruses • Fungi  
• Bacteria • Biofilms and antibiotic-resistant germs.  
The effect lasts up to 20 years

The \*clinic® technology is the  
only antimicrobial process that has  
EU biocide approval. \*Regulation (EU) No 528/2012.

burger swiss pen has the exclusive rights to this  
technology for use in writing instruments.

## CINEMA \*clinic®

Super large capacity refill with stainless steel tip  
lead-free, write-out length up to 6,000 m  
Standard colour: **clinic white**. Request samples.
