## PEARL® 100% Environmentally Friendly

Our oyster shells come directly from the oyster farms of Brittany, where they are cleaned and ground. They are then transported to Switzerland, directly to the production facilities of burger swiss pen. For us, short transportation routes are not only a operational necessity but a significant part of our environmental protection strategy. This also greatly reduces our CO2 footprint. Throughout our entire process chain, resource conservation is a top priority

## Unique Material Combination

High-quality recycling combined with ground oyster shells – that's pearl®, our unique, resource-efficient material combination. From discarded freezers, we create white granules. This process is known as high-quality recycling, or Post-Consumer Recycling. We exclusively use plastics that possess the exact high-quality properties we need: impact resistance, abrasion resistance, and UV resistance- all characteristics that make our products durable and of high quality.

pearl®

The Raw Material from the Sea

Environmentally Friendly Writing.  
For a conscious approach  
to our resources.

Pearl® contains a natural ingredient. Visible particles of shell are not a defect but a sign of authenticity.

### The Raw Material from the Sea

Introducing Beo pearl®, the attractive twist ballpoint pen - available with either a recycled metal tip or a pearl® plastic tip.

Meet Delta pearl®, the classic push ballpoint pen with a pearl® plastic tip. Delta pearl®, another classic push ballpoint pen, this time with a recycled metal tip.

Experience Solo pearl®, our modern push ballpoint pen with a recycled metal tip.

All models are equipped with our Swiss precision refill. Guaranteed to write 6,000 meters.

### Silky Smooth Surface

A distinctive feature of our 100% recycled pen is the 30% inclusion of ground oyster shells.

This natural ingredient not only gives the pen a silky surface and comfortable feel but also ensures sustainable resource utilization.

This combination of 100% post-consumer materials with a natural resource is truly unique

With pearl® you're not only writing smoothly but also making a statement for responsible

Pearl® contains a natural product.  
Visible particles are not a defect but a sign of authenticity

The unique combination of materials:  
100% post consumer recycling plus oyster shells.
